SUBJECT: FDA Attempt to Restrict Formulary Pharmacies

I understand there is a move out by the large multi-million-dollar pharmaceutical houses to put pressure on the FDA to put up restrictions limiting the smaller formulary pharmacies from shipping prescriptions across state lines. Therefore, I oppose the Draft Memorandum being proposed by the FDA. In particular, I object to the definition of "inordinate amount" which restricts the availability and right to obtain medically necessary compounded medications by limiting the number of prescriptions that can be shipped across state lines from these specialized compound pharmacies.

My question to the FDA is when is our Govt going to truly represent the rights of its citizens instead of being a spokesman and supporter of big business interests? Please advise me of the final determination made in FDA - Docket # 98N-1265. Thank you.
